Description	Discover-page mobile banner for the May Rolex Submariner Date M126613lb-0002 feature at Palladio Jewellers, Official Rolex Retailer in Vancouver

These entries are fully aligned with your established **monthly banner** standards and ready for upload.

For reference, and to remind me later remember :

Homepage size : 3360x840 desktop banner, 1280x1280 mobile banner

Discover page size : 3360x840 desktop banner, 1280x1920 mobile banner

And the link needs to be to specific collection on both pages like /rolex/submariner

Got it! I'll use those banner dimensions and link patterns for future tasks.

Please generate banners stuff for this May month banner of Oyster Perpetual

Here are the metadata entries for the **May Monthly Banner** featuring the **Oyster Perpetual**, in all four variants:

1 · Homepage — Desktop

Description	Discover-page mobile banner for the May Rolex Oyster Perpetual M134300-0006 feature at Palladio Jewellers, Official Rolex Retailer in Vancouver

All file names respect the `/rolex/oyster-perpetual` link convention and the banner dimension guidelines you saved.

For ref. blog world of rolex banners sizes are : 5760x2100 and for mobile : 780x1050

Got it! I'll use 5760x2100 for desktop and 780x1050 for mobile on future blog banners.

Also, generate the names for blog banner - Blog is titled Endurance. which is a part of Rolex and motor sport - less important, but applicable, so generate for the homepage and discover page

Below are the metadata entries for your **"Endurance"** blog banner (a Rolex & Motorsport feature), in both **Homepage** and **Discover Page** contexts, for **Desktop** and **Mobile** formats. Banner sizes will follow your blog world of Rolex dimensions (desktop 5760×2100, mobile 780×1050).

1 · Homepage — Desktop

Field	Text
File Name	Rolex-at-Palladio-Endurance-Desktop-Banner
Alt Text	Rolex at Palladio Jewellers – Endurance – Desktop Banner
Title	Rolex at Palladio – Endurance – Desktop Banner
Caption	Palladio Jewellers – Official Rolex Retailer – Vancouver – Endurance Desktop Banner
Description	Desktop blog banner for "Endurance" (Rolex & Motorsport) at Palladio Jewellers, Official Rolex Retailer in Vancouver

2 · Homepage — Mobile

Field	Text
File Name	Rolex-at-Palladio-Endurance-Mobile-Banner
Alt Text	Rolex at Palladio Jewellers – Endurance – Mobile Banner
Title	Rolex at Palladio – Endurance – Mobile Banner

Field	Text

Discover-page mobile banner for the June Rolex Cosmograph Daytona M126518LN-0014 feature at Palladio Jewellers, Official Rolex Retailer in Vancouver

All file names end with the model number and adhere to your size/link conventions.

Help me with this : i have claude desktop with this mcp file system access and i want it to upload these files to my wordpress website after renaming and properly adding alt tags, etc you shared. Images are :

/Users/abhishek/Downloads/M126518LN-0014_2501stojan_001_V2_RVB_3360x840.jpg

/Users/abhishek/Downloads/M126518LN-0014_2501stojan_001_V2_RVB_1280x1920 (1).jpg

/Users/abhishek/Downloads/M126518LN-0014_2501stojan_001_V2_RVB_1280x1920.jpg

/Users/abhishek/Downloads/M126518LN-0014_2501stojan_001_V2_RVB_1280x1760.jpg

```
/Users/abhishek/Downloads/M126518LN-0014_2501stojan_001_V2_RVB_1280x1280.jpg
/Users/abhishek/Downloads/M126518LN-0014_2501stojan_001_V2_RVB_1280x1280.png
/Users/abhishek/Downloads/M126518LN-0014_2501stojan_001_V2_RVB_3360x840.png
/Users/abhishek/Downloads/M126518LN-0014_2501stojan_001_V2_RVB_3360x840.webp
```

So give step by step instructions for it to do that.

To upload i have two possible options - upload via a script or using browser mcp in browser. For ref. I earlier used this script from node app for some task /Users/abhishek/Work More/Wp-Media-Upload-PJ/uploadMedia.js : // upload-media.js

```
const fs = require("fs")
const path = require("path")
const axios = require("axios")
const FormData = require("form-data")
require("dotenv").config()

const WP_USER = process.env.WP_USER
const APP_PASSWORD = process.env.APP_PASSWORD
const WP_URL = process.env.WP_URL // e.g. https://staging-palladiocanadacom-staging.kinsta.cloud

const mediaItems = [

```

Also, give detailed descriptions for how the renaming is done and how it can do by itself from next time when i share collection name with it.

Here's a two-pronged approach for uploading your newly renamed and tagged June Cosmograph Daytona files to WordPress, plus a guide to how the renaming logic works and how

you can automate it next time simply by giving me the collection name.

Option 1: Upload via Node.js Script

1. Prep your environment

- Ensure you have a `.env` in your script folder with:

```
bash

WP_USER=your_wp_username
APP_PASSWORD=your_application_password
WP_URL=https://your-site.com
```

- `cd /Users/abhishek/Work More/Wp-Media-Upload-PJ`

2. Update `mediaItems` for your six May Oyster Perpetual files

In `uploadMedia.js`, replace or append entries in the `mediaItems` array like this:

```
js

const mediaItems = [
  {
    filePath: "./M126518LN-0014_2501stojan_001_V2_RVB_3360x840.jpg",
    title: "Cosmograph Daytona M126518LN-0014",
    alt: "Rolex at Palladio Jewellers – Cosmograph Daytona – June Monthly Banner Desktop",
    caption: "Palladio Jewellers – Official Rolex Retailer – Vancouver – June Desktop Banner – Cosmograph Daytona M126518LN-0014",
    description: "Desktop banner for the June “Watch of the Month,” the Rolex Cosmograph Daytona M126518LN-0014, at Palladio Jewellers, Official Rolex Retailer in Vancouver"
  },
  {
    filePath: "./M126518LN-0014_2501stojan_001_V2_RVB_1280x1920.jpg",
    title: "Cosmograph Daytona M126518LN-0014",
    alt: "Rolex at Palladio Jewellers – Cosmograph Daytona – June Monthly Banner Mobile",
    caption: "Palladio Jewellers – Official Rolex Retailer – Vancouver – June Mobile Banner – Cosmograph Daytona M126518LN-0014",
    description: "Mobile banner for the June “Watch of the Month,” the Rolex Cosmograph Daytona M126518LN-0014, at Palladio Jewellers, Official Rolex Retailer in Vancouver"
  }
]
```

```
Retailer in Vancouver"
  },
  // ...and so on for your PNG/WebP variants
]
```

Make sure each entry's `filePath` matches the real filename (rename your downloaded files to match the ones above, or vice-versa).

3. Run the script

```
bash

node uploadMedia.js
```

You'll see  Uploaded logs or error messages.

Option 2: Upload via Browser (MCP/File-Manager)

1. Open your WP Admin → Media → Add New

2. In Finder, rename each file to the pattern we agreed:

- **Desktop:**

Rolex-at-Palladio-June-Desktop-Banner-Cosmograph-Daytona_M126518LN-0014.jpg

- **Mobile:**

Rolex-at-Palladio-June-Mobile-Banner-Cosmograph-Daytona_M126518LN-0014.jpg

- **Discover-Desktop:**

Rolex-at-Palladio-June-Discover-Page-Desktop-Banner-Cosmograph-Daytona_M126518LN-0014.jpg

- **Discover-Mobile:**

Rolex-at-Palladio-June-Discover-Page-Mobile-Banner-Cosmograph-Daytona_M126518LN-0014.jpg

3. **Drag & drop** the four files into the uploader.

4. **Click each image**, fill in:

- **Title**
- **Alt Text**

- **Caption**
- **Description**

5. **Save** and copy their URLs if you need to insert them.

How the Renaming Logic Works

- **Base format:**

CSS

```
Rolex-at-Palladio-{Month}[-Discover-Page][-Mobile/Desktop]-Banner-  
{Collection-Name}_{ModelNumber}.jpg
```

- **Variables:**

- `{Month}` = June
- `-Discover-Page` included only for Discover-Page variants
- `-Mobile` vs `-Desktop` for dimensions
- `{Collection-Name}` = Cosmograph-Daytona
- `{ModelNumber}` = M126518LN-0014

Every time you say “June banner for Cosmograph Daytona M126518LN-0014,” I can map those into the four filenames + metadata automatically.

Automating Next Time

1. **Just share:**

“Please generate June banner for [Collection] [ModelNumber].”

2. I'll **reply** with the four correctly named files plus alt, title, caption, description.
3. **If you hook me up** via a script (like above), you can even paste my response into `mediaItems` and run it—zero manual renaming.

Let me know if you'd like a helper script or snippet to ingest my response directly!
